APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the
source. It is understood that the amount of water herein granted
is only a temporary allowance and that the final water right
obtained under this permit will be dependent upon the amount of
water actually placed to beneficial use. It is also understood
that this right must allow for a reasonable lowering of the
static water level at permittee's well due to other ground water
development in the area. A substantial weir or other type of
measuring device must be installed and measurements of water use
kept. The well shall be equipped with a 2-inch opening for measur-
ing depth to water. If well is flowing, a valve must be installed
and maintained to prevent waste. The State retains the right
to regulate the use of the water herein granted at any and all times.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 2.0 cubic feet per second, but not to exceed a yearly duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Actual construction work shall begin on or before February 9, 1978

Proof of commencement of work shall be filed before March 9, 1978

Work must be prosecuted with reasonable diligence and be completed on or before February 9, 1979

Proof of completion of work shall be filed before March 9, 1979

Application of water to beneficial use shall be made on or before February 9, 1981

Proof of the application of water to beneficial use shall be filed on or before March 9, 1981

Map in support of proof of beneficial use shall be filed on or before March 9, 1981

Commencement of work filed MAR 23 1978

Completion of work filed SEP 27 1978
